

A6

A6 is a standalone fingerprint T&A product with simple access control. It has built-in Linux operation system and DP URU4000 sensor .The identification speed is within 2 seconds. Flash drive solves the problem of no PC in local site. The time attendance records can be downloaded into the flash drive and take it to where there is PC. With Remote identification system, A6 provides a good solution for efficient management of a company with 1000-5000 staff. Also, A6 with Web management makes you navigate the records in it trough TCP/IP at your convenience.

Features:

- 2006 version of algorithms with dependability accuracy, identification speed obviously improved, it can manage 3000 fingerprint templates within 2 seconds.
- Support finger 360 degree identification, easy to use
- 6 times auto alarm can be adjusted for alarm time (Siren)
- External interface for sound box with PA system integration available
- The Public and private short message that can be sent to defined person
- Basic door control function with additional optional control board

Technical Specifications:

Specs	Descriptions
Size	196 (L) x 120 (W) x 40 (H) mm
User Capacity	1500 Templates
Transaction Storage	50,000 transactions
Hardware Platform	ZEM200
Operating System	LINUX
Communications	RS232, RS485, TCP/IP
FP Sensor	U.are.U Sensor`
Identification Time	<= 2 Seconds
FAR	<= 0.0001%
FRR	<=1%
LED Colour	Red & Green
LCD Specs	128 x 64 with Green Backlight
Optional	Web Management System, ID Cards, RIS (Remote Identification System)
Operating Temperature	0° - 45°
Operating Humidity	20% - 80%
Language	English. (with voice greeting)
